Profile

Motivated and enthusiastic final-year undergraduate student pursuing B.Tech in Artificial Intelligence and Data Science. Strong foundational knowledge in computer programming ,data analysis and bussiness management .Skilled in problem Solving,teamwork eager to apply these abilities in real world challenges through projects and opportunities.

Skills

Programming Languages: Python, Java,c

Databases: SQL,Mysql,MongoDB

Cloud: AWS Cloud Practitioner Essentials

Frameworks and libraries:numpy,pandas
Scipy,scikit-learn,matplotlib,seaborn,keras
Tensorflow,Hugging face transformer.

Development & Version Control:Git,Github,vscode,jupyter notebook

Artificial Intelligence & Machine Learning: Regression, Clustering
Classification, Feature Engineering, Model Evaluation.

Deep learning: ANN, CNN, RNN, LSTM, Transfer Learning.

Other Skills: Problem-solving, Teamwork, Communication

Internships

5G Technologies (1st July 2025 – 31st July 2025)

Project:GitLab Metrics Analysis and Task Tracking Utility

tech:python,gitlab,graphQL API.

Developed a Python utility that integrates with GitLab's GraphQL API to automatically extract task data and compute productivity metrics, enabling data-driven tracking of task progress and effort efficiency.

Big Si Bucks (1st June 2024 – 30th June 2024)

Project: AI resume finder

tech: Python, Streamlit, Sentence-BERT ,LLM.

I built an AI Resume Finder that works like an ATS. It uses Sentence-BERT to measure semantic similarity between resumes and job descriptions, and optionally uses an LLM for deeper reasoning and explanations

Certifications

- AWS Cloud Practitioner Essentials
 - Data Science for Engineers
 - Spoken tutorial certification
 - Infosys Spring Board Certification
-

Projects

Brain tumor prediction

Developed a deep learning -based system for the automated detection of brain tumors from MRI images dataset using CUSTOM-BUILT (CNN) .It was designed and trained on a dataset containing MRI brain scans categorized as tumor and non tumor.The Primary goal is to assist radiologists by providing a fast technologies to diagnosis.

Technologies: Python, TensorFlow/PyTorch, Numpy, Opencv, matplotlib, Scikit-learn, Pandas,Streamlit

Image andText Processing for Visually Impaired Individuals

Designed and developed an AI-driven assistive solution that convert handwritten documents and PDFs into machine-readable text using Optical Character Recognition (OCR) and Natural Language Processing techniques. Integrated an interactive voice- based retrival system to enable visually impaired users to access and navigate content through speech commands.The system supports multilingual text recognition, text to speech conversion .

Technologies: Python, Tesseract OCR, OpenCV, NLTK, gTTS/PyTTSx3, SpeechRecognition API, Flask/Streamlit

Education

B.Tech Artificial Intelligence and data science

St. Joseph's College of Engineering, Chennai | 2022 – 2026 CGPA : 8.02

Class XII – Sri Shanmuka Matriculation Higher Secondary School, Mannargudi | 2021 – 2022

Percentage: 82.16%

Class X – Laurel Central Board of Secondary Education, Pattukkottai | 2019 – 2020

Percentage: 67%
